## Experience

### Full Stack Engineer

Hashnode

Oct 2017 - present

Core team at Hashnode, building a *Friendly and inclusive Q&A community for coders*. Features required me working across the stack, with **ReactJS** on the frontend and **NodeJS** and **MongoDB** in the backend.

- Optimized the page load performance, bringing load times down from 11 to 4 seconds.
- Currently working on a re-write of the client side app, focusing on performance.

### Web Engineer

Saltside

July 2016 - Oct 2017

Contributed to the web stack (front-end and server-side, **ExpressJS + PugJS + React/Redux**) that impacts millions of users across Saltside's products - **Bikroy.com, Ikman.lk & Tonaton.com**.

A few features I worked on here were:

- Converting all listing pages to AMP.
- Simplifying the online hiring process for job listings using the Employer Dashboard.
- Automated the Ad listing-fees' sales & payment process, as well as the Buy-Now workflow.

### Technical Intern

HOUSING.com

May 2015 - July 2015

**Placed second in RealHack by Housing** and was hired as an intern.

Worked on Backoffice Panel, a CMS for internal use, built with **AngularJS**.

## Projects

### sendback.io

**sendback.io** is a micro-app that helps mock HTTP status codes for you, so you can build your applications faster! ⚡

### MERN.io v3.0

The next version of MERN - a scaffolding tool & framework to easily build production ready universal apps using a **M**ongoDB, **E**xpressJS, **R**ect/Redux & **N**odeJS stack.

### ReviewBot

ReviewBot is a **slack integration** that helps ease and speed up the Pull Request review process. Built during my time at Saltside, it improved the efficiency of the development teams.

## Talks & Articles

### JS For Newbies #2 - Data types, arrays, objects, functions

January 2018, JS Meetup Bangalore (Online)

<http://bit.ly/js-for-newbies-2>

### Redux Middleware - A DIY Guide

December 2017, ReactJS Bangalore

<http://bit.ly/middleware-for-redux>

### Investigating Memory Leaks (and performance tuning your Javascript)

October 2017, AngularJS & ReactJS Bangalore

<http://bit.ly/memory-leaks-javascript>

### Co-owner & Author at CampVanilla

<https://blog.campvanilla.com/>
